Subject: ESA Consultation for CA Se Water Quality Criterion - Proposed Rule

All,
Thank you for your time and participation in last Thursday's call concerning the ESA consultation for EPA's proposed selenium water quality criterion for California's freshwaters. As discussed, we look forward to correspondence from you by the end of September concerning the species and habitat lists for consultation and identification of any important data or information that may be difficult for EPA to find in published literature.

We also appreciate your identification of a point-of-contact for your agency (Joe for NMFS and Carol for FWS), for this consultation process. We believe this will be an efficient way to coordinate and work through technical issues.

Please let me know if you have any questions or concerns. Thank you again, and we look forward to working with you.

Diane
